

iPhone Email setup:

Go to Settings/Passwords & Accounts/Add Account/Other

Add Mail Account

Fill in:

Name John Appleseed

Email john.appleseed@example.com

Password XXXXXXXX

Description My example.com email

Choose mail type IMAP (synchronizes iPhone mailbox with server mailbox, so deletions are instant, BUT ensure phone has enough storage for your entire mailbox.)

or POP (allows separate handling of mailboxes, so you can keep only what mail you want on the phone, and set when to remove the copy from the server)

Incoming Mail Server:

Host Name mdimailxx.midwestdatainc.com OR mdimailxx.midwestdatainc.com (Ask MDI for Host server name)

User Name john.appleseed@example.com

Password XXXXXXXX

Outgoing Mail Server:

Host Name mdimailxx.midwestdatainc.com OR mdimailxx.midwestdatainc.com

(Ask MDI for Host server name)

User Name john.appleseed@example.com

Password XXXXXXXX

Verify that you have chosen the appropriate mail type and that the typing is all correct. And touch SAVE.

Any errors will not allow it to continue until you correct them.

Enjoy your mobile email experience.
